Dear Komet Customer,

11 July 2011

Ref; (RTZ) - Raw Material Surcharge.

During the past months the prices of the Raw Materials associated with the manufacture of tooling and carbide inserts has increased dramatically. Komet has absorbed much of this during the year due to efficient handling, unfortunately we are unable sustain this indefinitely and with regret need to apply a (RTZ – Raw Material Surcharge) of 3.2% from 1st September 2011.

We thank you for your understanding in this matter and should the Raw Material costs decrease Komet will reduce or remove completely this surcharge.

Yours Faithfully

Steve Kirk
Managing Director
Komet (UK) Ltd
